# JEWELS

The finishing touch of any outfit, a jewel, reflects your mood and a need for color or originality. From signature items to fantasy versions, all Longchamp jewels combine leather and metallic accessories and have a style and finish that reflect the brand's codes and know-how.

## STAR MODELS:

**38049 ROSEAU:** This slim bracelet is the brand's new signature piece, formed from three palladium-coated, brass bamboo stems. Its timeless design creates a modern, sophisticated look. This item can be worn alone or layered with other jewelry.

**38059 MAILBOX:** This bracelet in embossed calfskin showcases the brand's artisanal leatherworking craftsmanship. It is decorated with a pin buckle adorned with the Longchamp rider at full gallop.

*All Longchamp jewels have metal alloy parts (zamak, brass, steel, etc.) that are surface treated to give a specific finish (silver, gold, antique brass, etc.). They are then coated with a varnish to preserve their color, make them shine and protect the part from oxidation.*

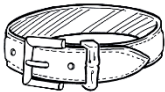

*All Longchamp jewels are 'nickel free', in other words, it complies with the 2004 European law prohibiting the sale of products that come into contact with the skin (belt buckles, jewellery, piercings, etc) that are likely to release nickel.*
